Thank you! That's a lot of rock to remove.

Could you send me a map of the NFB site - it shows all the areas 1-7 and has red dots, yellow dots. One of the attorneys showed it to me, but wouldn't let me use it.

Hi Dan:

To follow up on your question from last week regarding the amount of material left to remove at NFB, below is an estimate.

The figure attached breaks down our designated Areas. We have estimated approximately 44,000 tons of material is left to remove from Areas 1, 2, 3, 4, 7, and the northern rear warehouse of GNBC. This includes the blending material needed to meet disposal acceptance criteria. The material in the office area in GNBC and Area 5 have been removed.

The estimated disposal cost is between \$4-5 million and transportation cost is between \$2-3 million (\$6-8 million total).

Our team's gamma survey provided the data below. This shows the highest readings we obtained in each Area.

Area 1: 421 μ R/hr

Area 2: 402 μ R/hr

Area 3: 390 μ R/hr

Area 4: 171 μ R/hr

Area 5: 313 μ R/hr (This reading is prior to excavation. Levels are now at background)

Area 6: 188 μ R/hr (Area 6 is not part of this action memo or removal action)

Area 7: 820 μ R/hr

I think we are OK. the audio worked, which was what concerned me yesterday. I do not need a follow up intv immediately. Maybe we talk again in a month or so to check on the status of \$\$

Eric, based on our interview last week, I think I am OK. I was able to record it.

Good Morning Dan:

We wanted to touch base and let you know that we are working with our public affairs office to schedule a phone interview tomorrow, August 17th at 11:30am. We will send you an update once we know.

Could you please provide some of the questions you would want answered so I can pull the appropriate information prior?

Thanks.

Hi guys

Is it possible to one short interview to follow up on our discussion last week? I'd like to do it Thursday if we could?
